

The LIONWISE™ system is ideal for bars and nightclubs, including sports bars, music halls and theaters. The LIONWISE Bar & Nightclub POS (Point-of-Sale) solution helps you to process large volumes of orders rapidly for improved customer service and increased profitability. The LIONWISE system reduces the steps required to process an order and offers greater flexibility in closing out a tab. The fast bar order screens provides intuitive, at-a-glance menu selections using brand name logos for liquor and beer items, so that bartenders can spend more time serving customers and less time in front of a POS computer screen.

The LIONWISE system helps you to manage your bar or nightclub business more profitably with comprehensive reporting capabilities, providing up to the minute visibility into daily sales, open tabs, employee performance, and menu item and inventory consumption.

- Fast Bar function improves customer service and increase profitability.
- Security controls monitor cash drawer accountability with cashiers and bartenders.
- Ability to assign a credit card to a customer's tab.
- Ability to share tabs between bartenders.
- Allows bartenders to login to multiple workstations simultaneously.
- One touch for repeat round orders.
- Item countdown showing real-time quantity on hand, either visible to the waitstaff, or only visible to management, for control purposes.
- Offline option to accept credit cards when processor connection is down.
- New drinks maybe added to the menu from any workstation on the floor by management, instantaneously updated at all workstations.
- One Touch to bring up a recipe showing ingredients for a mixed drink or food item.
- All database changes are distributed instantaneously to all workstations without having to reboot the system.
- Unlimited data retention capability in the back office.
- Gratuities, Discounts and Service Charges auto-adjust whenever changes are made to the guest check.
- Menu and employee maintenance from any POS workstation.
- House Account module including complete statements from the back office suitable for mailing.
- Gift Card module with no swipe fees.

Easy to Use

The LIONWISE system provides an intuitive, easy to use interface for both management and the staff, allowing for key administrative functions such as pricing, specials and other menu changes to be performed at any POS workstation. Navigation is quick and easy allowing the user to get where they need to be in two touches. Staff can easily handle split check and item sharing requests with a simple "highlight-and-tap" feature. The ability within the LIONWISE system to quickly and easily correct misapplied payments, move checks to a different table and handle employee time card adjustments help keep your business running smoothly. As new staff members come on board, a real-time training mode allows for hands-on training in a simulated environment without affecting the live business reporting.

Whether you're an independent bar or nightclub or a multi-unit chain, having information to make better, faster decisions is critical to success. The LIONWISE system offers a comprehensive suite of reports that can be run and monitored from any workstation, not just the back office.

The Ultimate in Visibility and Control

- Timely and actionable data that helps ensure your profitability
- Make decisions quickly and confidently to help prevent unnecessary costs
- Instantly view key performance indicators in an easy-to-read dashboard
- Exception-based alerts trigger attention to potential areas of concern
- Important information can be reliably distributed to core personnel

Reporting and Analysis

- Site-level and Enterprise-level consolidated reports
- Create custom reports with configurable templates
- Trending with comparison of period-by-period analytics
- Detailed drill-down for daily sales and labor performance
- Provides greater management of site-level cash handling
