

advancing point-of-sale • enabling profitability™

The LIONWISE™ system is ideal for fast casual restaurants, including counter or quick service, take-out and ice cream restaurants. The LIONWISE Fast Casual POS (Point-of-Sale) solution allows orders to be taken quickly and accurately, with any item or function to be accessed in as little as two touches of the screen.

LionWise, LLC recognizes that each restaurant differentiates itself not only in the quality and consistency of its food, but also in how well it serves its customers and is able to adapt to unique order taking processes. LIONWISE helps you manage your fast casual restaurant business more profitably with comprehensive reporting capabilities, providing up to the minute visibility into daily sales, open checks, employee performance, and menu item and inventory consumption.

# Fast Casual

- All database changes are distributed instantaneously to all workstations without having to reboot the system.
- Offline option to accept credit cards when processor connection is down.
- Security controls monitor cash drawer accountability with cashiers and bartenders.
- One Touch to bring up a recipe showing ingredients for a drink or food item.
- Hold and Fire of menu items easily managed by waitstaff.
- Item countdown showing real-time quantity on hand, either visible to the waitstaff or only visible to management, for control purposes.
- Easy to move back and forth from counter service to table service.
- Unlimited data retention capability in the back office.
- Gratuities, Discounts and Service Charges auto-adjust whenever changes are made to the guest check.
- Management may open closed guest checks for adjustments.
- Menu and employee maintenance from any POS workstation.
- Flexible payment options: High-speed credit card, house account, gift cards, gift certificates, and cash tender.
- House Account module including complete statements from the back office suitable for mailing.
- Gift Card module with no swipe fees.
- Retail module for an internal gift/specialty store with complete inventory.

## Easy to Use

The LIONWISE system provides an intuitive, easy to use interface for both management and the staff, allowing for key administrative functions such as pricing, specials and other menu changes to be performed at any POS workstation. Navigation is quick and easy allowing the user to get where they need to be in two touches. Staff can easily handle split check and item sharing requests with a simple "highlight-and-tap" feature. The ability within the LIONWISE system to quickly and easily correct misapplied payments, move checks to a different table and handle employee time card adjustments help keep your business running smoothly. As new staff members come on board, a real-time training mode allows for hands-on training in a simulated environment without affecting the live business reporting.

Whether you're a small independent fast casual restaurant, or a multi-unit chain, having information to make better, faster decisions is critical to success. The LIONWISE system offers a comprehensive suite of reports that can be run and monitored from any workstation, not just the back office.

## The Ultimate in Visibility and Control

- Timely and actionable data that helps ensure your profitability
- Make decisions quickly and confidently to help prevent unnecessary costs
- Instantly view key performance indicators in an easy-to-read dashboard
- Exception-based alerts trigger attention to potential areas of concern
- Important information can be reliably distributed to core personnel

## Reporting and Analysis

- Site-level and Enterprise-level consolidated reports
- Create custom reports with configurable templates
- Trending with comparison of period-by-period analytics
- Detailed drill-down for daily sales and labor performance
- Provides greater management of site-level cash handling
