

serving point-of-sale • enabling profitability™

The LIONWISE™ system is ideal for multi-unit restaurants and specialty retailers, including franchises, regional independents, and fast casual chain restaurants, bars and nightclubs. The LIONWISE Multi-Unit POS (Point-of-Sale) solution helps you to manage operations at each individual location and consolidate reporting for multiple locations. Individual locations can quickly and easily process large volumes of sales orders rapidly for improved customer service and increased profitability.

The LIONWISE system reduces the steps required to process an order at check out, and offers complete flexibility in payment options including: High-speed credit card authorization, gift cards, gift certificates, house account, and cash tender transactions. The LIONWISE POS screens provide intuitive, rapid entry of items so that customer check-out can be completed quickly and accurately, allowing you to handle peak customer traffic volumes.

Multi-Unit

- All database changes are distributed instantaneously to all workstations without having to reboot the system.
- Business financial reporting including sales and guest check reporting, labor reporting, and tax and tip reporting.
- Business report scheduling and custom report building capabilities.
- Security controls monitor cash drawer accountability with cashiers and bartenders.
- Offline option to accept credit cards when processor connection is down.
- Ability to manage employee revenue center, employee training records, employee wage rate settings and time card adjustments.
- Manage the automatic scheduling and configuration of reports.
- Item countdown showing real-time quantity on hand, which can either be visible to the waitstaff or only visible to management for control purposes.
- Menu and employee maintenance from any POS workstation.
- Gift card program creation and maintenance.
- Retail module for an internal gift/specialty store with complete inventory.
- Gratuities, Discounts and Service Charges auto-adjust whenever changes are made to the guest check.
- One Touch to bring up a recipe showing ingredients for a drink or food item.
- Unlimited data retention capability in the back office.

Easy to Use

The LIONWISE system provides an intuitive, easy to use interface for both management and the staff, allowing for key administrative functions such as pricing, promotions and other item changes to be performed at any POS workstation. Navigation is quick and easy allowing the user to get where they need to be in two touches. Staff can easily handle discounts, item look-ups, voids and returns. The ability within the LIONWISE system to quickly and easily correct misapplied payments, hold orders and handle employee time card adjustments help keep your business running smoothly. As new staff members come on board, a real-time training mode allows for hands-on training in a simulated environment without affecting the live business reporting.

Whether you're a restaurant or retail based multi-unit chain, having information to make better, faster decisions is critical to success. The LIONWISE system offers a comprehensive suite of reports that can be run and monitored from any workstation, not just the back office.

The Ultimate in Visibility and Control

- Timely and actionable data that helps ensure your profitability
- Make decisions quickly and confidently to help prevent unnecessary costs
- Instantly view key performance indicators in an easy-to-read dashboard
- Exception-based alerts trigger attention to potential areas of concern
- Important information can be reliably distributed to core personnel

Reporting and Analysis

- Site-level and Enterprise-level consolidated reports
- Create custom reports with configurable templates
- Trending with comparison of period-by-period analytics
- Detailed drill-down for daily sales and labor performance
- Provides greater management of site-level cash handling
