

The LIONWISE™ system is ideal for specialty retail stores, including butcher shops, fish markets, gift shops, country clubs, wine & liquor stores, and small grocery markets. The LIONWISE Specialty Retail POS (Point-of-Sale) solution helps you to quickly and easily process large volumes of sales orders rapidly for improved customer service and increased profitability. The LIONWISE system reduces the steps required to process an order at check out, and offers complete flexibility in payment options including: High-speed credit card authorization, gift cards, gift certificates, house account, and cash tender transactions. The specialty retail screens provide intuitive, rapid entry of items so that customer check-out can be completed quickly and accurately, allowing you to handle peak customer traffic volumes.

The LIONWISE system helps you to manage your specialty retail business more profitably with comprehensive reporting capabilities, providing up to the minute visibility into daily sales, employee performance, and item and inventory consumption.

- Complete Inventory tracking and management.
- Inventory may be entered/adjusted from any workstation on the floor.
- Barcode Scanning interface.
- Weight Scale interface.
- Ability to store and recall checks from customers who call in orders.
- Sales and Inventory transaction reporting.
- Retail cashier transaction processing.
- Security controls monitor cash drawer accountability with cashiers.
- Item look-up by name.
- Discounts applied for all or for just selected items.
- Offline option to accept credit cards when processor connection is down.
- All database changes are distributed instantaneously to all workstations without having to reboot the system.
- Unlimited data retention capability in the back office.
- Employee clock-in and clock-out maintenance from any POS workstation.
- Flexible payment options: High-speed credit card, house account, gift cards, gift certificates, and cash tender.
- House Account module including complete statements from the back office suitable for mailing.
- Gift Card module with no swipe fees.
- Flexibly apply sales tax.
- Item countdown showing real-time quantity on hand.

Easy to Use

The LIONWISE system provides an intuitive, easy to use interface for both management and the staff, allowing for key administrative functions such as pricing, promotions and other item changes to be performed at any POS workstation. Navigation is quick and easy allowing the user to get where they need to be in two touches. Staff can easily handle discounts, item look-ups, voids and returns. The ability within the LIONWISE system to quickly and easily correct misapplied payments, hold orders and handle employee time card adjustments help keep your business running smoothly. As new staff members come on board, a real-time training mode allows for hands-on training in a simulated environment without affecting the live business reporting.

Whether you're an independent specialty retail or a multi-unit chain, having information to make better, faster decisions is critical to success. The LIONWISE system offers a comprehensive suite of reports that can be run and monitored from any workstation, not just the back office.

The Ultimate in Visibility and Control

- Timely and actionable data that helps ensure your profitability
- Make decisions quickly and confidently to help prevent unnecessary costs
- Instantly view key performance indicators in an easy-to-read dashboard
- Exception-based alerts trigger attention to potential areas of concern
- Important information can be reliably distributed to core personnel

Reporting and Analysis

- Site-level and Enterprise-level consolidated reports
- Create custom reports with configurable templates
- Trending with comparison of period-by-period analytics
- Detailed drill-down for daily sales and labor performance
- Provides greater management of site-level cash handling
